

# Automotive Industry – **Functional Cubing** – Laminating with Fibres

<b>Functional Cubing</b>			
<b>Laminating</b>	<b>Attachment parts Carbon Fibre</b>	EL-2201 / EH-2904-1	Good wetting properties with carbon fibres, fast reactivity
		EL-2201 / EH-2905-1	The same properties as with EH-2904-1, medium reactivity
		EL-2201 / EH-2906-1	The same properties as with EH-2904-1, slow reactivity
		EL-2203 / EH-2952-1	Excellent wetting properties with carbon fibres, temperature resistant up to 120°C, fast reactivity
		EL-2203 / EH-2953-1	The same properties as with EH-2952-1, slow reactivity
<b>Resin Infusion</b>		EL-2203 / EH-2970-1	Low viscosity, no degassing under vacuum, excellent wetting properties, flows very well, good cure at room temperature, temperature resistant up to 120°C.
		EI-2500 / EH-2970-1	Temperature resistant (115°C), good impregnation, resin infusion
		EI-2504 / EH-2974	Excellent wetting properties, flows very well, temperature resistant up to 170°C.
